PROFESSIONAL SUMMARY

UX/UI designer and technology professional with a background spanning user-centered design, software development, IT support, digital media, and interactive experiences. Experienced in building and supporting technology in collaborative, Agile environments, translating technical needs into practical solutions, and creating accessible user experiences. Currently pursuing an M.S. in Human-Computer Interaction with an Interactive Computing focus.

CORE SKILLS

Programming: C#, C, Python, Java, JavaScript, PHP, MySQL

Web & App Development: HTML5, CSS, React Native

UX & Design: UI/UX Design, UX Research, User-Centered Design, Human Factors, Interactive Prototyping

Software & Tools: Unity, Arduino, Linux Systems, 3D Modeling & Animation, Microsoft Lists, Excel

Methods: Agile, Scrum, SOP Writing & Technical Documentation

Technical Support: PC Building & Repair, Hardware/Software Troubleshooting, AV Support

PROFESSIONAL EXPERIENCE

IT Support Intern | JetZero

Long Beach, CA | May - August 2026

- Built a simulation PC and calibrated the Hangar Flight Simulator.
- Created an onboarding tool to calculate per-user licensing and hardware costs.
- Provided hardware and software support in a fast-paced startup environment.

PC Technician & IT Support | City of Charleston

Charleston, SC | 2025–2026

- Re-imaged, configured, and deployed PCs for use across City departments.
- Diagnosed and repaired technology used by municipal departments and staff.
- Provided AV and technical support for City Council meetings.

Technology Associate | International African American Museum

Charleston, SC | 2024–2025

- Managed technology systems and AV equipment supporting exhibits, events, and collaborations.
- Supported technical development for museum installations, research, and archival projects.
- Built and maintained a device database using Microsoft Lists and Excel.
- Wrote SOPs and user guides for technology systems and hardware.

EDUCATION

M.S. — Human-Computer Interaction, Interactive Computing

Georgia Institute of Technology | Atlanta, GA | Expected May 2028

B.A. — Computing in the Arts, Digital Media Concentration

College of Charleston | Charleston, SC | May 2024 | GPA: 3.57 | Cum Laude

SELECTED PROJECTS

- **Data Center Safety Reporting — Graduate Design Project:** Researching and redesigning a mobile hazard-reporting tool for field employees, plus a dashboard for off-site teams to monitor risks and spot recurring trends.
- **Remote Work & Neurodivergence — Graduate Research Project:** Researching/designing a tool to assist remote neurodivergent workers(ADHD, autism, dyslexia) in building trust and connection with their team and work.
- **The Wind Within — Capstone Project:** Developed a web-based interactive art platform with a team, focusing on user interface and digital-media integration.
- **Public Plot — Mobile UI/UX Project:** Designed a mobile application interface in React Native and applied user-centered design principles.
- **Unity Game Development:** Collaborated on small game-development projects using Unity and C#.

AFFILIATIONS & HONORS
